***Election/Restrictions***

Claims 33, 37-51, 53-74 are pending. Claims 37-51, 70-73 were subject to a Restriction Requirement and stand withdrawn because they are not directed to elected invention. Claims 70-73 are withdrawn because they are not directed to elected species. (see Office Actions filed on January 12 2005 and July 16, 2003). Claims 33, 53-69, 74 are subjected to a further Restriction Requirement as outlined below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33, 53-57, 62, 64, 66, 69 drawn to a method of identifying an optimal range of zeta potential for a composition for targeting to an activated vascular site, classified in class 424, subclass 450, or 499.
- II. Claims 58-61, 63, 65, 67, 69, 74 drawn to methods of modifying an agent to enhance its efficacy, classified in class 514, subclass 2+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, each set of claims in Group I and Group II are directed to methodologies that are divergent in function and end effects. Accordingly, they are directed to different functions or different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the

search required for Group I is not required for Group II as evidence by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- (a) various imaging or diagnostic agents,
- (b) various therapeutic agents.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, either a single imaging or diagnostic agent, or a single therapeutic agent for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently claims 33, 58, 60, 61 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 1617

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Due to complexity of this case, no telephone call was made to request an oral election to the above restriction requirement. (see MPEP § 812.01) Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shahnam Sharareh whose telephone number is 571-272-0630. The examiner can normally be reached on 8:30 am - 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan, PhD can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
